PROJECTS

- **PulsyDrive:** May 2025 – Aug 2025
Tools: Arduino, EMG Sensor, IR Module, Flex Sensor, Motor, Fitness APK, Database, API, Solar Power System
◦ Designed an affordable, adaptive mobility device for underserved regions like Bangladesh
◦ Integrated six unique control systems including finger, voice, eye, facial expression, neck, and muscle (EMG)
◦ Built with modular, customizable design supporting upgrades and health monitoring features
◦ Implemented solar-powered energy system for continuous off-grid use
◦ Developed portable, foldable structure for convenience in everyday mobility
- **Face Recognition & Name Attachment System:** May 2025 – May 2025
Tools: Python, dlib, OpenCV, face_recognition, Pickle
◦ Developed command-line interface for training and real-time webcam-based recognition
◦ Implemented face encoding using dlib's ResNet model and Euclidean matching
◦ Created majority voting system for robust face-name association
◦ Enabled webcam-based live recognition with annotated bounding boxes
- **Make Schedule:** Mar 2025 – Apr 2025
Tools: C++, Python, CMake, Makefile, Pyside6
◦ Console-based automatic timetable generator
◦ Built a conflict-free scheduling engine using C++
◦ Used Makefile and CMake for structured project builds
◦ Implemented input validation and optimal slot allocation
- **Gym Management System:** Feb 2025 – May 2025
Tools: PHP, MySQL, HTML, CSS, JavaScript
◦ Created user modules for admins, trainers, and members
◦ Managed session tracking and record updates using MySQL
◦ Built responsive pages with CRUD functionality
- **My Anime List:** Aug 2024 – Oct 2024
Tools: Java, SOLID Principles
◦ Java app to track anime using clean architecture
◦ Designed OOP structure with interface segregation and dependency inversion
◦ Implemented listing, searching, and rating functionalities
- **Dot-Remove:** Feb 2024 – Feb 2024
Tools: Python, customtkinter, PyInstaller
◦ GUI to delete unwanted file types in folders
◦ Built a user-friendly file cleanup interface
◦ Enabled recursive folder scanning and selective deletion
◦ Packaged executable for end-user distribution
- **Student Management System:** Feb 2024 – Mar 2024
Tools: Java, Swing, SQL, Serialization
◦ Academic record manager with GUI
◦ Built GUI for managing student records

- Implemented persistent storage via SQL and serialization
- Added sorting, searching, and user authentication
- **Byte Wizard:** Mar 2024 – Apr 2024 
Tools: Python, Tkinter, Chocolatey, Batch Scripts
 - Development environment installer for Windows
 - Automated setup of essential dev tools via Chocolatey
 - Designed GUI to select and install multiple utilities
 - Integrated logging and system checks for reliability
- **Bank Management System:** Jan 2024 – Feb 2024 
Tools: C, SHA-256, File I/O
 - Secure CLI banking software with file I/O
 - Created features for transactions, balance check, and password protection
 - Secured data using SHA-256 hashing
 - Used text file storage for offline recordkeeping
- **Tik-Tak-Toe:** Dec 2023 – Jan 2024 
Tools: Java, Swing
 - Desktop-based Tic Tac Toe using Java Swing
 - Implemented interactive GUI with turn-based logic
 - Handled win/draw states and visual cell highlighting
- **Project Car:** Nov 2023 – Dec 2023 
Tools: C, graphics.h, Turbo C++
 - C animation of a car with user controls
 - Programmed vehicle animation with speed and direction control
 - Added background elements and a "Game Over" condition
